Volume 224 1989

Contents

Letters to the Editor

Chemical evolution of high redshift galaxies
Fritze-v.-Alvensleben, U., Krüger, H., Fricke, K.J., Loose, H.-H. L1

Electric antennae in the outer heliosphere: the importance of being stable
Meyer-Vernet, N. L5

Numerical simulations of scattering in the interstellar medium applied to rapid radio variability in the quasar 0917+624
Wambsganss, J., Schneider, P., Quirrenbach, A., Witzel, A. L9

Z CMa: a large-scale high velocity bipolar outflow traced by Herbig-Haro objects and a jet
Poetzel, R., Mundt, R., Ray, T.P. L13

Blue supergiant supernova progenitors
Langer, N., El Eid, M.F., Baraffe, I. L17

Active galactic nuclei and the spectrum of the X-ray background
Setti, G., Woltjer, L. L21

A search for HCOCN in molecular clouds
Gerin, M., Combes, F., Encrenaz, P., Turner, B., Wootten, A., Bogey, M., Destombes, J.L. L24

The gravitational lens hypothesis for 0846+51 W1 supported by new observations
Stickel, M., Fried, J.W., Kühr, H. L27

HD 145206: the first semibarium star with a main-sequence close companion?
Boffin, H.M.J., Jorissen, A. L31

Cosmology

A percolation analysis of cluster superclustering
Börner, G., Houjun Mo 1

Extragalactic astronomy

The wind and shock model for quasars: confrontation with observations of 3C 273
Courvoisier, T.J.-L., Camenzind, M. 10

Optical polarization of the M 87 jet
Fraix-Burnet, D, Le Borgne, J.-F., Nieto, J.-L. 17

Two-fluid model of superluminal radio sources: application to cosmology
Pelletier, G., Roland, J. 24

Distribution of gas and star-forming regions in Mk 171: Three galaxies?
Casoli, F., Combes, F., Augarde, R., Figon, P., Martin, J.M. 31

Erratum: Chemical and photometric properties of a galactic wind model for elliptical galaxies
Arimoto, N., Yoshii, Y. 361

Erratum: Spheroidal systems as a one-parameter family of mass at their birth
Yoshii, Y., Arimoto, N. 361

Formation, structure and evolution of stars

Simultaneous *UBVRI* photometry of Nova DQ Herculis (1934)
Schoembs, R., Rebhan, H. 42

Neutrino emission from type II supernovae: an analysis of the spectra
Janka, H.-T., Hillebrandt, W. 49

The distance of the helium-variable B star HD 37479
Hunger, K., Heber, U., Groote, D. 57

Peculiar and normal early-type stars in the galactic halo
Conlon, E.S., Brown, P.J.F., Dufton, P.L., Keenan, F.P. 65

Observed and synthesized populations of Wolf-Rayet stars: their evolution and the influence of metallicity
Arnault, Ph., Kunth, D., Schild, H. 73

The influence of periodic external conditions on birth rates of O/B stars
Nepveu, M. 86

Evolution of massive binaries including the effect of convective core overshooting
Vanbeveren, D. 93

Gravity-darkening for stars with a Roche lobe filling convective envelopes in close binary systems
Sarna, M.J. 98

Pulsating CP2 stars. II. γ Equulei (HD 201601) and β Coronae Borealis (HD 137909)
Weiss, W.W., Schneider, H. 101

White dwarf luminosity functions calculated from models of galactic evolution and the age of the galactic disk
Yuan, J.W. 108

The radioactivity of SN 1987 A
Lehoucq, R., Cassé, M., Cesarsky, C.J. 117

Strömgren photometry of the variable Wolf-Rayet star HD 86161 = WR 16
van Genderen, A.M., van der Hucht, K.A., Bakker, P.R. 125

Stellar atmospheres

The UV silicon spectra of early B stars
Massa, D. 131

Time-dependent corona models: global relaxation oscillations
Korevaar, P., Hearn, A.G. 141

Ultraviolet flares on II Pegasi
Doyle, J.G., Byrne, P.B., van den Oord, G.H.J. 153

Heavy elements in the 2000–3000 Å range of four Ap stars
Faraggiana, R. 162

Behaviour of the O I triplet at λ 7773. III. Am stars
van 't Veer-Menneret, C., Faraggiana, R., Gerbaldi, M., Castelli, F., Burkhart, C., Floquet, M. 171

Flux-flux relation: Mg II h and k versus X-rays in dwarf M and K stars
Mathioudakis, M., Doyle, J.G. 179

(RN) Continuum emission of novae
Andrade, A.A., Friedjung, M. 187

Diffuse matter in space (including H II regions and planetary nebulae)

Magnetised molecular cloud edges
Vallée, J.P. 191

Small-scale structure in the DR 21/DR 21 (OH) region: a high resolution continuum study at millimetre and submillimetre wavelengths
Richardson, K.J., Sandell, G., Krisciunas, K. 199

Zeeman splitting in interstellar molecules
Bel, N., Leroy, B. 206

High resolution H I observations of H II regions. I. Orion A
van der Werf, P.P., Goss, W.M. 209

The Sun

The origin and the diagnostic capabilities of the Stokes *V* asymmetry observed in solar faculae and the network
Solanki, S.K. 225

(RN) Quasi-periodicities in solar type II burst groups
Mangeney, A., Pick, M. 242

Dynamics of the solar atmosphere. II. Standing waves in the solar chromosphere
Fleck, B., Deubner, F.-L. 245

Solar cycle induced variations of the low *l* solar acoustic spectrum
Pallé, P.L., Régulo, C., Roca Cortés, T. 253

Stochastic acceleration of solar protons in the transrelativistic region
Steinacker, J., Schlickeiser, R. 259

Comparison of Hα absorbing features with soft X-ray images at the onset of solar flares
Mouradian, Z., Martres, M.-J., Soru-Escaut, I., Simnett, G.M. 267

Simultaneous rapid X-ray and optical intensity fluctuations from a small part of a flaring active region
Simnett, G.M., Mouradian, Z., Martres, M.-J., Soru-Escaut, I. 284

The solar system

The influence of electron impact ionization on the distribution of interstellar helium in the inner heliosphere; possible consequences for determination of interstellar helium parameters
Rucinski, D., Fahr, H.J. 290

The 1977 Palomar-Leiden Trojan Survey
van Houten-Groeneveld, I., van Houten, C.J., Wisse-Schouten, M., Bardwell, C., Gehrels, T. 299

Collisional probability of planetesimals revolving in the solar gravitational field. III
Ida, S., Nakazawa, K. 303

Celestial mechanics and astrometry

Intercomparison of the Earth rotation parameters determined by two independent VLBI networks
Yoshino, T., Takahashi, Y., Kawaguchi, N., Heki, K., Yokoyama, K., Manabe, S. 316

A method for predicting a strong earthquake by means of astrometric observations
Hu Hui, Kan Rongju, Wang Rui, Cai Xin, Chen Cuixian 321

Optical positions of 21 radio sources in the Brorfelde system
Geffert, M., Tucholke, H.-J., Walter, H.G., Moreno, M.A., Ivanova, V., Sinachopoulos, D. 323

Physical and chemical processes

Density diagnostic and inhomogeneous plasmas. I. Isothermal plasmas
Almleaky, Y.M., Brown, J.C., Sweet, P.A. 328

Instruments, data processing, and computational methods

Deprojection of anisotropic emission in transparent systems
Kaastra, J.S. 338

Dynamical Voronoi tessellation. I. The two-dimensional case
Zaninetti, L. 345

Solar feature correlation tracker for ground-based telescopes
von der Lühe, O., Widener, A.L., Rimmele, Th., Spence, G., Dunn, R.B., Wiborg, P. 351

Abstracts of articles which have been published in A. & A. Suppl. Ser. 80, No. 2, and 80, No. 3

Chromospheres of late-type active and quiescent dwarfs. I. An atlas of high resolution Ca II H profiles
Rebolo, R., García Lopez, R., Beckmann, J.E., Vladilo, G., Foing, B.H., Crivellari, L. 362

IRAS sources beyond the solar circle. I. CO observations
Wouterloot, J.G.A., Brand, J. 362

Chromospheres of late-type active and quiescent dwarfs. II. An activity index derived from profiles of the Ca II λ 8498 Å and λ 8542 Å triplet lines
Foing, B.H., Crivellari, L., Vladilo, G., Rebolo, R., Beckmann, J.E. 362

Spectrophotometry of southern planetary nebulae. I. Plasma diagnostics
Acker, A., Köppen, J., Stenholm, B., Jasniewicz, G. 363

Meter wavelength structures, flux densities and accurate positions of weak radio sources
Akujor, C.E., Noshi, M.N., Kazès, I. 363

Oscillator strengths and damping constants from the solar spectrum at λλ 830–870 nm
Erdelyi-Mendes, M., Barbuy, B. 363

Early-type galaxies with dust lanes: observations of a northern sample
Gregorini, L., Meşsina, A., Vettolani, G. 363

uvby photometry of wide visual double stars. III.
Oblak, E. 364

Chemical abundances in early B-type stars. I. Sample and metal line equivalent widths
Kilian, J., Nissen, P.E. 364

The Cepheid 1162 Aquilae
Mavridis, L.N., Nikolov, N.S., Avgoloupis, S.I., Varvoglis, P.P. 365

A multiplet table for Mn I
Adelman, S.J., Svatek, G.F., Van Winkler, K., Warren Jr., W.H. 365

Lagrangian satellites of Tethys and Dione. I. Reduction of observations
Oberti, P., Veillet, C., Catullo, V. 365

An extragalactic database. I. The catalogue of principal galaxies
Paturel, G., Fouqué, P., Bottinelli, L., Gougenheim, L. 366

Spectral evolutionary synthesis models of metal-poor star forming regions
Olofsson, K. 366

Orbits of six visual double stars
Couteau, P. 367

Infrared photometry and spectrophotometry of SN 1987 A. I. March to October 1987 observations
Bouchet, P., Moneti, A., Slezak, E., Le Bertre, T., Manfroid, J. 367

The IUE-UV spectrum of the CP2 star HR 465
Fuhrmann, K. 367

Erratum: Radial velocities. II. Ground based measurements for Hipparcos
Fehrenbach, Ch., Duflot, M., Burnage, R., Mannone, C., Peton, A., Genty, V. 367
